

ONE YEAR DIPLOMA IN CYBERSECURITY

**Abreonix CyberSecurity Delivers
Top NIELIT-certified Training.**

Abreonix CyberSecurity

BASIC NETWORKING.

LEVEL 1

- Module 01: Network Fundamentals
- Module 02: Network Concepts
- Module 03: IP Addressing (IPv4 & IPv6)
- Module 04: Subnetting & CIDR
- Module 05: VLSM & Summarization
- Module 06: OSI Model
- Module 07: TCP/IP Model
- Module 08: Network Devices & Cabling
- Module 09: ARP & ICMP
- Module 10: Packet Flow
- Module 11: Traffic Sniffing & MITM
- Module 12: Static Routing
- Module 13: RIP Protocol
- Module 14: EIGRP Protocol
- Module 15: OSPF Protocol
- Module 16: Route Redistribution
- Module 17: Telnet & SSH
- Module 18: DHCP Configuration
- Module 19: Access Control Lists (ACLs)
- Module 20: Switching Basics
- Module 21: L2 Protocols (CDP, VLAN, STP, DTP, VTP)
- Module 22: EtherChannel
- Module 23: Port Security

LINUX ESSENTIALS

LEVEL 2

- Module 01: RHEL Introduction
- Module 02: Command-Line Access
- Module 03: CLI File Management
- Module 04: Help & Documentation
- Module 05: File Creation & Editing
- Module 06: User & Group Management
- Module 07: File Permissions & ACLs
- Module 08: Process Monitoring & Control
- Module 09: Service & Daemon Management
- Module 10: SSH Configuration & Hardening
- Module 11: Log Management & Analysis
- Module 12: Network Configuration
- Module 13: Archiving & File Transfer
- Module 14: Package Management (YUM/DNF)
- Module 15: Filesystem Navigation & Mounts
- Module 16: System Analysis & Support

PYTHON PROGRAMMING

LEVEL 3

- Module 01: Python Introduction
- Module 02: Python vs Other Languages
- Module 03: Variables & Data Types
- Module 04: Operators in Python
- Module 05: Conditional Statements
- Module 06: Looping Concepts
- Module 07: Control Statements
- Module 08: Type Casting
- Module 09: Numbers in Python
- Module 10: Strings in Python
- Module 11: Lists
- Module 12: Tuples
- Module 13: Dictionaries
- Module 14: Arrays
- Module 15: Date & Time Handling
- Module 16: File Handling (I/O)
- Module 17: Multithreading
- Module 18: Email Automation
- Module 19: Database Connectivity
- Module 20: Object-Oriented Programming (OOPs)
- Module 21: Network Programming
- Module 22: Graphical User Interface (GUI)
- Module 23: Web Scraping
- Module 24: Image Processing
- Module 25: Data Science Basics
- Module 26: Introduction to Machine Learning
- Module 27: Introduction to Artificial Intelligence
- Module 28: Functions in Python

ETHICAL HACKING

LEVEL 4

- Module 01: Introduction to Ethical Hacking
- Module 02: Active Footprinting (Tool-based)
- Module 03: Passive Footprinting
- Module 04: Advanced Network Scanning
- Module 05: Enumeration & User Discovery
- Module 06: System Hacking & Password Attacks
- Module 07: Malware: Viruses & Worms
- Module 08: Trojans & Backdoors
- Module 09: Bots & Botnets
- Module 10: Traffic Analysis & MITM (Kali)
- Module 11: Traffic Analysis & MITM (Windows)
- Module 12: Social Engineering (Theory)
- Module 13: Social Engineering Toolkit (Practical)
- Module 14: DoS & DDoS Attacks
- Module 15: Web Session Hijacking
- Module 16: SQL Injection (Manual)
- Module 17: SQL Injection (Automated Tools)
- Module 18: Web Application Security Basics
- Module 19: Web Server Exploitation & Rooting
- Module 20: Wireless Hacking (CLI Manual)
- Module 21: Wireless Hacking (Tools & GUI)
- Module 22: Evasion Techniques (IDS/Firewall)
- Module 23: Honeypots & Deception Techniques
- Module 24: Buffer Overflow Fundamentals
- Module 25: Cryptography Basics
- Module 26: Penetration Testing Fundamentals
- Module 27: Mobile Device Hacking
- Module 28: IoT Security & Hacking
- Module 29: Cloud Security Overview

CYBER FORENSICS INVESTIGATION

LEVEL 5

- Module 01: Introduction to Cyber Forensics
- Module 02: Forensic Investigation Process
- Module 03: Hard Disk & File System Analysis
- Module 04: Data Acquisition & Duplication
- Module 05: Anti-Forensics & Countermeasures
- Module 06: Windows Forensics
- Module 07: Linux Forensics
- Module 08: Network Forensics
- Module 09: Web Forensics
- Module 10: Dark Web Forensics
- Module 11: Cloud Forensics
- Module 12: Email Forensics
- Module 13: Malware Forensics
- Module 14: Mobile Forensics
- Module 15: IoT Forensics

ADVANCED PENETRATION TESTING

LEVEL 6

- Module 01: PenTest Introduction
- Module 02: In-Depth Scanning
- Module 03: Exploitation Techniques
- Module 04: Command-Line Essentials
- Module 05: Kali Linux Mastery
- Module 06: Bash Scripting
- Module 07: Practical Pentest Tools
- Module 08: Active Recon
- Module 09: Passive Recon
- Module 10: Buffer Overflow Basics
- Module 11: Advanced Buffer Overflows
- Module 12: Exploit Fixing & Hardening
- Module 13: Public Exploit Research
- Module 14: AV & Evasion Techniques
- Module 15: Secure File Transfer & Exfiltration
- Module 16: Windows Privilege Escalation
- Module 17: Linux Privilege Escalation
- Module 18: Password Attack Strategies
- Module 19: Port Redirection & Tunneling
- Module 20: Active Directory Attacks
- Module 21: PowerShell Post-Exploitation
- Module 22: Advanced Labs & Challenges
- Module 23: PenTest Reporting & Breakdown

WEB APPLICATION SECURITY

LEVEL 7

- Module 01: Web Security Intro
- Module 02: OWASP Top 10
- Module 03: Recon & Footprinting
- Module 04: Advanced SQLi
- Module 05: Command Injection
- Module 06: Session & Auth Flaws
- Module 07: CSRF (Cross-Site Request Forgery)
- Module 08: SSRF (Server-Side Request Forgery)
- Module 09: XSS (Cross-Site Scripting)
- Module 10: IDOR (Insecure Direct Object Ref)
- Module 11: Sensitive Data Exposure
- Module 12: SSTI (Server-Side Template Injection)
- Module 13: MFA Bypass Techniques
- Module 14: HTTP Request Smuggling
- Module 15: XXE (XML External Entities)
- Module 16: LFI / RFI (File Inclusion)
- Module 17: Source Code Disclosure
- Module 18: Directory Traversal
- Module 19: HTML Injection
- Module 20: Host Header Injection
- Module 21: SQL Auth Bypass
- Module 22: File Upload Vulnerabilities
- Module 23: JWT / Token Attacks
- Module 24: Security Misconfiguration
- Module 25: Open Redirects (URL Redirection)
- Module 26: Web Flood / DoS Attacks

MOBILE APPLICATION SECURITY

LEVEL 8

- Module 01: Platform Misuse
- Module 02: Insecure Data Storage
- Module 03: Insecure Communication
- Module 04: Weak Authentication
- Module 05: Poor Cryptography
- Module 06: Insecure Authorization
- Module 07: Client Code Flaws
- Module 08: Code Tampering
- Module 09: Reverse Engineering
- Module 10: Hidden & Extraneous Functions

ENDPOINT SECURITY

LEVEL 9

- Module 01: Internet Security & Antivirus
- Module 02: Multi-Factor Authentication (MFA)
- Module 03: Mobile Device Management (MDM)
- Module 04: Data Loss Prevention (DLP)
- Module 05: SIEM (Security Information & Event Management)
- Module 06: Advanced Persistent Threats (APT)
- Module 07: MITRE ATT&CK Framework
- Module 08: EDR & XDR Solutions
- Module 09: Unified Threat Management (UTM)
- Module 10: Firewall Configuration & Policies
- Module 11: ISO 27001 Compliance Basics

IoT PENTESTING

LEVEL 10

- Module 01: IoT Overview & Importance
- Module 02: IoT Penetration Testing
- Module 03: Introduction to IoT
- Module 04: Sensor Networks
- Module 05: IoT Communication Models
- Module 06: Frequency Basics
- Module 07: Wireless Protocols
- Module 08: Web vs IoT Protocols
- Module 09: Interfaces – SPI, UART, I2C
- Module 10: IoT Firewall Essentials
- Module 11: Arduino Fundamentals
- Module 12: Raspberry Pi Basics
- Module 13: Mobile App Integration
- Module 14: Flipper Zero Tools
- Module 15: Firmware Analysis
- Module 16: IoT Hardware Analysis
- Module 17: SDR (Software-Defined Radio)
- Module 18: IoT Product Design & PRD
- Module 19: IoT Cloud Models (IaaS, PaaS, SaaS)
- Module 20: ICS (Industrial Control Systems) Basics

AWS ASSOCIATE

LEVEL 11

- Module 01: System Design & Scalability
- Module 02: Implementation & Deployment
- Module 03: Cloud Data Security
- Module 04: Troubleshooting & Optimization

AWS CLOUD SECURITY

LEVEL 12

- Module 01: AWS Security Overview
- Module 02: Identity & Access Management (IAM)
- Module 03: Virtual Private Cloud (VPC) Security
- Module 04: Data Protection in AWS
- Module 05: Securing AWS Servers
- Module 06: Edge & Network Security
- Module 07: AWS Monitoring Tools
- Module 08: Logging & Auditing in AWS
