

3 Months BASIC CYBERSECURITY

**Abreonix CyberSecurity Delivers
Top NIELIT-certified Training.**

Abreonix CyberSecurity

BASIC NETWORKING.

LEVEL 1

- Module 01: Network Fundamentals
- Module 02: Network Concepts
- Module 03: IP Addressing (IPv4 & IPv6)
- Module 04: Subnetting & CIDR
- Module 05: VLSM & Summarization
- Module 06: OSI Model
- Module 07: TCP/IP Model
- Module 08: Network Devices & Cabling
- Module 09: ARP & ICMP
- Module 10: Packet Flow
- Module 11: Traffic Sniffing & MITM
- Module 12: Static Routing
- Module 13: RIP Protocol
- Module 14: EIGRP Protocol
- Module 15: OSPF Protocol
- Module 16: Route Redistribution
- Module 17: Telnet & SSH
- Module 18: DHCP Configuration
- Module 19: Access Control Lists (ACLs)
- Module 20: Switching Basics
- Module 21: L2 Protocols (CDP, VLAN, STP, DTP, VTP)
- Module 22: EtherChannel
- Module 23: Port Security

LINUX ESSENTIALS

LEVEL 2

- Module 01: RHEL Introduction
- Module 02: Command-Line Access
- Module 03: CLI File Management
- Module 04: Help & Documentation
- Module 05: File Creation & Editing
- Module 06: User & Group Management
- Module 07: File Permissions & ACLs
- Module 08: Process Monitoring & Control
- Module 09: Service & Daemon Management
- Module 10: SSH Configuration & Hardening
- Module 11: Log Management & Analysis
- Module 12: Network Configuration
- Module 13: Archiving & File Transfer
- Module 14: Package Management (YUM/DNF)
- Module 15: Filesystem Navigation & Mounts
- Module 16: System Analysis & Support

ETHICAL HACKING

LEVEL 3

- Module 01: Introduction to Ethical Hacking
- Module 02: Active Footprinting (Tool-based)
- Module 03: Passive Footprinting
- Module 04: Advanced Network Scanning
- Module 05: Enumeration & User Discovery
- Module 06: System Hacking & Password Attacks
- Module 07: Malware: Viruses & Worms
- Module 08: Trojans & Backdoors
- Module 09: Bots & Botnets
- Module 10: Traffic Analysis & MITM (Kali)
- Module 11: Traffic Analysis & MITM (Windows)
- Module 12: Social Engineering (Theory)
- Module 13: Social Engineering Toolkit (Practical)
- Module 14: DoS & DDoS Attacks
- Module 15: Web Session Hijacking
- Module 16: SQL Injection (Manual)
- Module 17: SQL Injection (Automated Tools)
- Module 18: Web Application Security Basics
- Module 19: Web Server Exploitation & Rooting
- Module 20: Wireless Hacking (CLI Manual)
- Module 21: Wireless Hacking (Tools & GUI)
- Module 22: Evasion Techniques (IDS/Firewall)
- Module 23: Honeypots & Deception Techniques
- Module 24: Buffer Overflow Fundamentals
- Module 25: Cryptography Basics
- Module 26: Penetration Testing Fundamentals
- Module 27: Mobile Device Hacking
- Module 28: IoT Security & Hacking
- Module 29: Cloud Security Overview
